

Moonlight Mile

by Dennis Lehane

(Morrow, 9780061836923, \$26.99)

"Patrick and Angie are back, and so are the consequences from the decisions they made years ago in the Gone, Baby, Gone case. The same child, Amanda McCready, now 16, has disappeared and the pair of P.I.s vow this time will be different when they track her down. Lehane is a master at exploring -- yet not answering or resolving -- difficult issues of morality and individual and social responsibility, all while giving the reader great dialogue, unexpected plot twists, and unforgettable characters. This is a sequel worthy of its predecessor."
